

H2O Solo 15'

H2O Canoe Company Solo 15 is slightly smaller and lighter solo for paddlers seeking a stable, user-friendly canoe, which is easy to handle both on and off the water! Although a little slower than H2O's Solo 16/6, the Solo 15 is still remarkably efficient and tracks well for its length. Its flared ends and distinctive modern-tumblehome sides keep water out, while permitting a comfortable efficient paddle stroke without reaching. A shallow arch hull is predictable and easy to control for beginners and intermediate canoeists in moderate conditions. Lighter than most kayaks of comparable length the Solo 15 canoe is easier to portage, offers greater capacity, and easily outperforms many kayaks of similar size – try it with a kayak paddle!

	Length	Width Yoke	Bow Rocker	Stern Rocker
Solo 15	15'	27"	2.5"	1.5"

*Optimal Weight Capacity is 280lbs Max.
