

# H2O Prospector 16'4

The Prospector's traditional symmetrical shape combines with a semi-round hull and moderate rocker for stable, but sensitive pivots or leans when carving turns. Sharp entry lines enhance but flare out quickly to increase buoyancy to float over large waves, rather than crash through them. Responsive yet predictable under all loads and conditions, Prospector 16-4 is a Canadian Classic.

## Specifications

Length	16' 4"
Weight	48lbs
Gunwale width	35"
Rocker	2.5"

**Max Weight Capacity – 950lbs**
